REVISION

2026.1

01

Standards & Expectations

What Matrix stands for, and what's expected of you every single job.

Our mission is to deliver a true **5-star experience** in every aspect of our service. Every team member is expected to take pride in producing 5-star quality work, while delivering an even higher level of customer service. The goal is not just to clean vehicles — it's to leave every customer impressed with both the results and the professionalism of our team.

We aim to create a high standard with room for growth in all areas. **Professionalism is key.** Your attitude, appearance, and communication should create a strong first impression and a natural wow factor. Being young, professional, kind, and hardworking is a powerful combination that earns respect from customers and builds habits that carry into all areas of life.

■ Non-negotiables

- ☐ **Speak professionally.** No slang, on the job or on the phone.
- ☐ **Clean, presentable appearance** at all times.
- ☐ **Positive attitude and a smile.** Be friendly and welcoming to everyone you encounter — not just the customer. A simple smile and wave when you make eye contact builds our brand image in the neighborhood.
- ☐ **Shake hands properly,** speak clearly and respectfully, keep strong body language.
- ☐ **Represent Matrix** so the whole experience feels 5-star from start to finish.

SAY IT EXACTLY LIKE THIS

Arriving: "Hi, my name is ___" — shake hand, wait for them to introduce themselves — "nice to meet you."

Leaving: "It was great to meet you, have a great rest of your day" — shake hand.

02

The Job, Start to Finish

Every detail follows the same six phases. Know this sequence cold — the rest of the handbook is just detail on each phase.

PHASE 1 Arrive Text ETA, knock, greet, shake hands.	PHASE 2 Inspect & Quote Walk the vehicle, talk to your partner, give final price.
PHASE 3 Upsell	PHASE 4 Set Up

Offer add-ons as recommendations, never pressure.	Keys, water, park spot, time range, generator.
PHASE 5 Detail Two lanes, working the car at the same time.	PHASE 6 Check Out Walkaround, review QR, payment, handshake, gone.

THE ORDER OF INTERIOR VS. EXTERIOR

Go off the sunlight and shade. Do **exterior first** if it's shaded now but the sun will be direct in an hour. Do **interior first** if the sun is direct at start but you'll have shade later. If you're using the car canopy as shade anyway, default to **interior first, exterior second** — it's faster for us, and the car is freshly washed with no dust settled when the customer comes out to look.

DO THIS ON EVERY JOB, NO EXCEPTIONS

Take pictures and video of the vehicle **before you start**. This protects you and the company if a customer later complains or accuses us of damage. Take final photos and video again at the end.

03 Arrival & Communication

Customer Service SOP — phone rules, greeting sequence, and departure.

■ Phone & Texting Rules

- ☐ Check conversations with clients regularly so you stay updated.
- ☐ **Do not text or call a customer without speaking to us first** — except for the situations listed below.

YOU MAY CONTACT THE CUSTOMER DIRECTLY TO:

- Text an ETA when you're headed their way, and keep them updated on arrival time.
- Text, call, or knock if you need anything during the detail.
- Let them know you're done, in whatever way they asked for.
- Ask the *next* customer if you can arrive early or late, depending on how the detail before them is running.

RUNNING EARLY OR LATE

Update the following appointments as soon as you're **confident** in your timing. Don't spam them and don't keep switching the time on them — send one solid update and **get confirmation that the new arrival time works**.

■ Greeting & Arrival — In Order

- 01 Knock or ring the doorbell.
- 02 **Greet professionally:** "Hi, I'm ___ with Matrix Mobile Details, here to detail your vehicle today" — shake hand — "nice to meet you."

- 03 Ask them to **come show you around the vehicle** and point out anything specific they're looking for, while letting them know you need to do an inspection to give a final price.
- 04 **Talk with your teammate** to determine the final price.
- 05 Give the final price.
- 06 Go through your sales methods and try to land add-ons — see \$05.
- 07 If the water tank is low, ask permission to use a hose faucet.
- 08 **Ask for the keys** in case you set the alarm off or lock the vehicle.
- 09 Give a **time range**. Ask if they're in a hurry, if they need anything else, and if you're parked in a good spot.
- 10 Ask **how they want you to let them know when you're finished**.

■ Exit & Departure

- 01 Have the vehicle fully prepped to hand back, with all media already taken.
- 02 Prepare the customer's keys and pull up the review QR code on your phone.
- 03 Let them know you're done — the way they told you they prefer.
- 04 **Show them around the vehicle** and explain some of the steps you did. Sell the *service*, not just the result. Stay with them during their inspection and tell them that if they find anything, you'll touch it up.
- 05 After the inspection, ask if there's anything else you can do or anything they see missed.
- 06 Ask how they want to pay, and explain the pricing, discounts, and fees for each method — see \$08.
- 07 **Before they pay**, show the review QR code: if they scan it, leave a review, and show you before paying, they get a discount off the detail.
- 08 Check them out, give the keys back, and ask one final time if there's anything else.
- 09 Shake hands: "It was great to meet you, have a great rest of your day — and let us know if you ever need anything else done in the future."

REVIEW DISCOUNT

The standard offer is **\$10 off**. It's adjustable — on a bigger ticket we've gone as high as \$25. Use your judgment, but never go below \$10.

■ After You Leave

Prep for the next detail and contact that customer with your ETA, or ask if it's okay to come early. Still **drive out of the neighborhood** before you stop — then either head slowly to the next detail or hit a gas station for gas, a drink, or a snack.

04 Pricing Reference

Every price is a *starting* price. You give the final quote after inspecting the vehicle — see §03.

■ Car Packages

PACKAGE	COUPE	SEDAN	SUV	TRUCK	3-ROW
Basic	\$210	\$220	\$230	\$230	\$275
Standard	\$280	\$290	\$300	\$310	\$350
Premium + CORRECTION + WAX	\$700	\$725	\$750	\$800	\$875
Deluxe + CORRECTION + CERAMIC	\$1,100	\$1,125	\$1,150	\$1,225	\$1,300

Premium = interior, exterior, paint correction, wax. **Deluxe** = interior, exterior, paint correction, ceramic coating.

■ Individual Services

SERVICE	COUPE	SEDAN	SUV	TRUCK	3-ROW
Exterior only	\$100	\$100	\$110	\$120	\$130
Exterior + Paint Correction	\$600	\$625	\$650	\$700	\$775
Exterior + Ceramic NEW CARS ONLY	\$775	\$800	\$825	\$900	\$975
Full Exterior EXT + CORRECTION + CERAMIC	\$975	\$1,000	\$1,025	\$1,100	\$1,175

EXTERIOR + CERAMIC IS FOR NEW CARS ONLY

Older cars need a correction first — **highly recommended**. Don't sell a coating onto defective paint. See §11.

Add-Ons

ADD-ON	PRICE	NOTES
Floor mats	\$50-\$75	WeatherTech restoration — see the pitch in §05
Wax	\$75	Pitch it at \$50 when bundling — see §05
Leather conditioning	\$50	Leather Star
Engine bay	\$75	
Headlight restoration	\$100	Confirm with Habib before quoting
Black plastic trim dressing	\$25+	Starting price — depends how much is needed
Pet hair removal	\$50+	Scales with severity
Acid wash water spot removal	\$150	Refunded if it doesn't work
Ceramic — wheels	+\$100	
Ceramic — windows/windshield	+\$100	Confirm with Habib before quoting
Ceramic — both	+\$175	Bundle price

Boats

SERVICE	RATE
Interior	\$20 / ft
Exterior	\$10 / ft
Interior + Exterior	\$27 / ft
Wax add-on	+\$5 / ft

BOAT ADD-ONS

Additional boat add-on rates and trailer tire shine are **not finalized**. Check with Habib before quoting anything beyond the four rates above.

VIP Membership

MEMBERSHIP SERVICE	DISCOUNT
Exterior only	15% off
Interior only	20% off
Standard	25% off
Each additional vehicle on the membership	+15% off
Ceramic coated by us	+15% off all membership services

HOW STACKING WORKS

Two Standards on one membership: **25% off the first vehicle, 40% off the second.**

\$280 → \$210, and \$280 → \$168. Total **\$560 → \$378.**

05 Sales & Upsells

You are a salesman in this role — but the customer should never feel like they're talking to one.

Reading the customer is an important skill in sales. It can't really be taught, but it's something you'll learn and improve on — and it's a great skill for every area of life.

To be good at this, **don't portray yourself as a salesman. Portray yourself as a friend** — giving recommendations and suggestions from your experience and knowledge. Give them options. Sell it. But show that you're not pushy: it's not required, the result will look good without it, and it's simply a great investment and upgrade if that's something they want to pay for.

■ Build the Connection First

- ☐ Find something real to talk about — **the Chiefs, the gym, cars, their dog** are all easy ones.
- ☐ Be nice to their dog if it comes out. Ask if you can give it one of the treats we keep in the van.

■ Bundle to Close

Make them a deal that *sounds* like a deal, so adding on feels obvious. Prices are variable and up to you — these are just the shape of it:

SITUATION	NORMAL	YOUR OFFER
Two cars, adding wax to both	\$50 each	\$50–75 for both
Floor mats + wax on one car	\$75 + \$75	\$100 for both

Get the gist and build your own versions.

■ The Four Add-On Pitches

FLOOR MATS – WEATHERTECH RESTORATION

YOU

Awesome, sounds good. Before we get started — I did notice you have WeatherTech floor mats. Now that's no problem, we always make sure to do our wash on those to get them as clean as they can get. But WeatherTech mats tend to fade and get scuffed up from shoes and stepping on them, so they end up looking dull even after the wash. We can restore that for you. We offer a WeatherTech restoration add-on that'll have them looking better than brand new — matte black, non-oily, non-slick finish — for _____. Is that something you'd want to add on? Totally optional and up to you.

WAX

YOU

Awesome, sounds good. Before we get started I'd love to offer you a wax add-on. It'd only be \$50 for you and it'll bring an extra shine to your vehicle, add a hydrophobic layer so water beads off, keep the car cleaner longer and easier to maintain, and leave a protective layer on your paint. Would you want us to go ahead and apply a wax?

TRIM RESTORATION

YOU

Awesome, sounds good. Before we get started — I did notice some of your trim and plastics looking faded and dull. We're able to restore those to looking brand new for \$_____ if you'd like.

NOTE

Physically show them the trim so you both agree on exactly what's getting restored — interior vs. exterior.

HEADLIGHT RESTORATION

YOU

Awesome, sounds good. Before we get started — I did notice your headlights are starting to get a little foggy. We're able to restore those and bring them back to as clear or clearer than new. We'll also add a protectant on top to keep them from fading again and give you more visibility at night.

■ Full Arrival Script

ARRIVAL → QUOTE → UPSELL → SETUP

YOU

Hey, this is ___ with Matrix Mobile Details. How's it going? I'm here to take care of your vehicle today.

CUSTOMER

...

YOU

Nice to meet you.

ACTION *Shake hands.*

YOU

If you don't mind, could you show me around your vehicle and point out anything specific you're looking to get out of this, while we take a look and do an inspection to give you the final price?

ACTION *Inspect. Talk with your teammate about the final price. Come back.*

YOU

After talking with my partner, the final price will need to go up to ___ due to ___. Is that okay with you? With the upcharge we'll make sure to take care of that — it usually takes us extra time, but I can assure you you'll be happy with the result.

OR *If there's no upcharge: "Yeah, after talking with my partner we think we can just stick with the original starting price for you."*

THEN *Run your add-on pitches from above.*

YOU

Perfect, we'll go ahead and get started. Could I grab the keys in case we lock ourselves out or set the alarm off on accident?

CUSTOMER

...

YOU

Thank you — we should take around ___ to ___ hours. Are you in any rush at all, or need us done by a certain time? And is the vehicle parked in an okay spot?

CUSTOMER

...

YOU

Sounds good. How will you want us to let you know when we're finished?

06 Interior Detail

Two detailers work the car at the same time. Detailer 1 owns every surface.
Detailer 2 owns carpets and mats. The shared steps below are done by

whoever is free.

■ Shared — Either Detailer

- ☐ Set up the **generator and steamer immediately** so the steamer is heating while you work.
- ☐ Inspect the vehicle and talk with the customer.
- ☐ Give the final quote **before starting and after inspecting**.
- ☐ Upsell — floor mats, or try to upgrade them to a Standard if there's enough time.
- ☐ Get the keys, in case you lock the car or set the alarm off.
- ☐ **Take pictures and video of the vehicle** for insurance reasons, in case of complaints or accusations of damage.
- ☐ Take out the floor mats.
- ☐ Help each other throughout the detail if needed.

SHARED – FINISHING THE INTERIOR

- ☐ Put in the paper floor mat, steering wheel cover, and fresheners. Add a business card, and a brochure if it's a good customer who could lead to more good customers.
- ☐ Put everything back in the vehicle. If there were a lot of belongings that had to come out, you can leave them in the plastic trash bags and put them in the trunk — **let the customer know**. If it's not much, just put it back where you got it.
- ☐ Spray new car smell — **two sprays under each floor mat**, then close the door and go get the customer.
- ☐ One person checks the customer out and shows them around while the other puts everything back in the van.
- ☐ Check out: payment, review, offer to text them in the future for more details, hand back the key, and be on your way.

D1 Surfaces

TOOLS

Steamer · detail brush · scrub pad · pick · microfibers · interior cleaner

- 01 **Turn on the steamer** and let it heat up.
- 02 Inspect the interior to determine your plan.
- 03 Take out all interior trim pieces that come out — cupholders, etc. — and put them in the van to do later.
- 04 **Start with all doors**, driver door first, ending at the passenger door. Steam the door panels to lift surface gunk, spray interior cleaner, use the detail brush for buttons, handles, cup holders and crevices, then the scrub pad for the panels and everything else. Wipe the entire door dry, and air compress to blow cleaner out of the crevices if available.
- 05 **Passenger dash** and surrounding surfaces, plus the plastic on the side of the seat with the adjusters. Steam, then mostly scrub pad with interior cleaner for the big panels. Detail brush for the seat adjuster buttons. Wipe everything off.
- 06 Work your way around doing all the surfaces, **ending at the driver seat**. Move the seats around so you reach every area.
- 07 **Driver side**: entire center console, then the steering wheel and everything around it, dash, all remaining driver-side surfaces, seat adjusters. Steam all over — especially between the plastics in the console — and use a pick to get gunk out from between any plastics. Spray interior cleaner and mostly use the detail brush. Recommended order: console → steering wheel → surrounding surfaces and dash.
- 08 **Railings**. Move the seat for maximum access, steam, spray, use a bad detail brush (red or black), wipe with a used towel.
- 09 **Leather seats**. Spread the crevices open and steam in between to lift gunk out. Steam gently into the perforations. If anything's left in a hole or crevice, use a pick or crevice brush. Wipe off the gunk, spray interior cleaner, use the clean side of the scrub pad over the entire seat, then wipe everything off.
- 10 **Removable trim pieces**. Pressure wash gently and at a distance, or use the steamer. Spray interior cleaner, drill brush, rinse, dry with a towel. Leave them in the van on top of a towel with another towel covering them. If they aren't that dirty, skip the pressure washer and drill brush — just interior cleaner, detail brush, wipe dry.
- 11 **Vents**. If just dusty, the vent swabs alone will do it. If actually dirty, spray interior cleaner on the swab before wiping, then dry the vents with a towel.
- 12 **All glass** — center console, dash, rear view mirror, windows, windshield. Spray onto the towel, not the glass. Go over it fast, then immediately buff with a second towel to prevent streaks. Waffle knit towels are best for windows.
- 13 Put all the removable trim pieces back where you got them.

OVERSPRAY

Spray the brush, or spray gently, so you don't overspray onto an area you already cleaned. If you do, wipe it immediately — if it dries it leaves a water spot and you're doing that panel again.

D2 Carpets & Mats

TOOLS

Air compressor · vacuum · foldable table · brush for strips

- 01 Take out all personal belongings.
- 02 Put trash in the trash can.
- 03 **Take out the mats** — vacuum what's on them, don't shake them onto the driveway.
- 04 Work on the mats on the foldable table.
- 05 If the carpets are **crazy dirty**, vacuum first with the wide nozzle.
- 06 Once the mats are out, **air compress all carpets** to bring dirt and hair into piles — this is 90% of the work.
- 07 Vacuum the piles. **Repeat the vacuum + air compress cycle twice more.**
- 08 Get the carpets as close to perfect as possible, leaving just one final vacuum for after Detailer 1 finishes everything.
- 09 Air compress the mats.
- 10 Vacuum the mats.
- 11 **Repeat the vacuum + air compress cycle twice more.**
- 12 Use a brush or any tool to create the **detailer strips**. Take the final picture.
- 13 Go back to the vehicle and do the **final vacuum** — the carpets should be perfect at this point.
- 14 Place the mats back in the car.
- 15 Put the wheel cover on.
- 16 Paper foot mat inside.
- 17 Air freshener inside.
- 18 Spray new car smell under the mats.
- 19 Leave a business card.
- 20 Leave a promo brochure if it's a nice car or house.

DETAILER 1 - WORKING TIPS

If the steamer isn't ready when you are, knock out the easy stuff first. Always carry **two microfibers** — one for wiping, one dirtier one for gunk. Same with detail brushes: keep a bad brush (black or red) for gunk. Use a pick for anything stubborn or stuck in a crevice.

07 Exterior Detail

Split the bugs and the wheels, then both of you contact wash the car together.

■ Shared Setup — Either Detailer

- ☐ Set up the generator and tools.
- ☐ Set up the **car canopy and weights**.
- ☐ Fill the brush bucket and wheel bucket with water.
- ☐ Fill the foam cannon with soap, spray it into both buckets to make them soapy, then pressure wash them to bubble.
- ☐ Put the mitts, or the extended mitt, into the bucket.

D1 Bugs & Front End

- 01 Rinse the front end for bugs — bumper, side mirrors, windshield, front of hood.
- 02 Spray bug remover.
- 03 Use a **wet soapy microfiber** to agitate and wipe the bug remover across the bumper, side mirrors, windshield, and front of hood.
- 04 Spray off.
- 05 Help Detailer 2 finish off the wheels.

D2 Wheels

One wheel at a time

- 01 **Pressure rinse the rim** — get off everything you possibly can with the pressure washer first.
- 02 Spray **Dark Fury** on the rim, tire, and caliper.
- 03 First contact with the hand mitt — get multiple angles.
- 04 **Red wheel brush** for inside the wheel barrel.
- 05 **Tire brush** on the tire — don't let it hit the paint.
- 06 **Long handle brush** for the wheel wells.
- 07 **Hand brush** over the whole rim, caliper, and lug nuts.
- 08 Rinse off the wheel.
- 09 **Repeat for the other three wheels.**
- 10 Rinse off the wheel tools and leave them to dry on the table.

■ The Wash — Both Detailers

- 01 Rinse off the vehicle under the car canopy. **Use the canopy weights.**
- 02 One person does the prerinse and foams the whole car down. Use a **Gold Class and water dilution** in the foam cannon — use all of it, and don't forget the roof.
- 03 **Both detailers start the contact wash.** Side to side, never circles. One uses the mitt, one uses the extension on a big car to reach the roof, hood, and low sections.
- 04 Contact wash all the **glass**, then all the **paint** — one direction the whole time — then go back over the glass.
- 05 Spray off the soap and rinse the vehicle.
- 06 **Ceramic wax** if needed: apply with the foam cannon, 1½ cap fulls of chemical. Let it sit 30 seconds, then rinse off.
- 07 **Dry the car and wheels.** Target black panels and glass first. Use one big towel, or two on a bigger car, and dry the entire paint and rims. Smaller microfibers for the rims and wheels.
- 08 **Wipe the door jambs** on a Standard detail or a high-end client. Microfiber alone if they're not bad, otherwise use interior cleaner.
- 09 Apply **tire shine on dry rims.**
- 10 Take pictures and video, then run the same checkout process — see §08.

DARK CAR IN DIRECT SUNLIGHT

Keep foaming the car up **during** the contact wash so the soap doesn't dry on the paint.

TOWELS

Never be scared of using too many towels. One big towel per car for paint — sometimes two.

08 Checkout & Payment

The last five minutes decide the review, the tip, and whether they book again.
Run it the same way every time.

■ The Checkout Sequence

- 01 **Final vehicle reset.** Take final photos. Return all belongings, floor mats, and personal items. Add the air freshener, floor mat cover, and steering wheel cover. Add a brochure for premium vehicles or clients who might be interested in higher-end or recurring services.
- 02 **Split up.** One person knocks and speaks with the customer. The other packs all equipment and supplies back into the van neatly and properly.
- 03 **Walkaround.** Show the customer around the vehicle and explain some of the work you did. Ask if there's anything they'd like touched up or any area they want

addressed before checkout.

- 04 Explain payment options clearly — see the table below.
- 05 Ask for the review before you ring them up. Pull up the QR code on your phone:
"Before I ring you up, we offer a special where if you scan this QR code and leave us a review while we're here, you'll get \$10 off your total."
- 06 Calculate the final total including discounts, card fees, taxes, add-ons, and upcharges.
- 07 Process the payment — see the method breakdown below.
- 08 Confirm the payment actually went through.
- 09 Close out. Thank them, be kind, shake hands, ask if there's anything else they need, tell them to have a great rest of their day or night.
- 10 Final check. Everything back in the van, all customer belongings returned to the vehicle, job site left clean — then head out.

■ Payment Methods — What to Quote

METHOD	MISSOURI	KANSAS	ADDED
Cash	10% off total	10% off total	-10%
Venmo	Regular price	Regular price	—
Check	Regular price	Regular price	—
Card (Square)	2.6% processing fee	2.6% fee + 7.98% sales tax	MO +2.6% KS +10.58%

HOW TO EXPLAIN THE KANSAS NUMBER

The 7.98% is a **Kansas service sales tax that we're required to charge** — it's not our markup and it's not up to us. Say it plainly: *"In Kansas we're required to charge sales tax on services, so with the card processing fee that comes out to 10.58% on top."*

■ Running Each Payment Type

Square — Card

- Go to **Checkout**.
- Select **Kansas Service** if you're in Kansas, **Missouri Service** if you're in Missouri.
- Enter the **base service price only** — fees are applied automatically.
- Review sale → Charge.
- **Tap to pay:** the card has to be held **perpendicular to the top of the phone**, on top of the tap sign. Let them try first; help if needed.
- Hand them the phone or flip it toward them: *"Now it's going to ask you a few questions and you can send yourself a receipt by text or email."*
- Confirm it went through.

Venmo

- Pull up the **business Venmo QR code**.
- Have them scan and send payment.
- **Confirm the payment was received** before you leave.

Cash or Check

- **Count it** in front of them.
- Store it in the **van's center compartment**.
- Confirm you received the full amount.

THE TIP SCREEN

Square will ask for a tip. It's a little awkward standing there — **don't look at the screen**. Give them space and let them do it comfortably.

■ Full Checkout Script

WALKAROUND → REVIEW → PAYMENT → GOODBYE

ACTION *Get the customer the way they told you they prefer.*

YOU

Hey ___, we're all done if you want to come take a look around! Came out looking like a whole new vehicle.

CUSTOMER

Looking around...

YOU

Let me know if you see anything, or if there's anything you want us to touch up at all.

CUSTOMER

Wowed...

YOU

We're glad you like it! Is there anything else you'd like us to do?

CUSTOMER

...

YOU

Sounds good — how are you wanting to pay? We take all forms of payment. Cash we do a 10% discount, card has a 2.6% processing fee, and in Kansas we're required to charge sales tax on services, so with the processing fee that'd be a total of 10.58% in tax and fees. Or Venmo would just be the regular price with no tax or fees.

CUSTOMER

Chooses...

YOU

Perfect — and before you pay, we do have a special right now. If you scan this QR code, leave a review, and show me before you pay, we can take \$10 off your total.

ACTION *They scan. While you wait: calculate the total and set up Square or Venmo.*

YOU

Thank you so much. Your final price will be ___.

ACTION *Square tap to pay, or Venmo QR — or skip ahead if they paid cash.*

YOU

Well, thank you so much for having us out today. Before we head out — is there anything else we can do for you?

CUSTOMER

...

YOU

Perfect. We hope you loved your detail and our services. Here's your key — it was great meeting you. We hope you have a great rest of your day, and feel free to contact us anytime if you have questions or want to book again. We'd love to come back out for you.

ACTION

Shake hand. Leave. Prep for the next detail and send that customer your ETA.

09 Chemicals & Dilutions

Know what every bottle does before you spray it on someone's car.

READING A DILUTION

1:10 means 1 part chemical to 10 parts water. The first number is always the chemical.

■ Interior

CHEMICAL	USE	DILUTION
Pol Star	Interior cleaner	1:10
Terminator	Stain remover — step 1	None, or a little water to make it last
Carpet Bomber	Stain remover — step 2	1:5 – 1:8
Finisher	Stain remover — step 3	None
Glass Cleaner	All glass and windows	—
Blackline Freshener	New car smell spray	—

■ Exterior

CHEMICAL	USE	DILUTION
GSF	Car soap	4 caps in foam cannon
Bug Remover	Front end, bumper, windshield	1:8
Dark Fury	Heavily soiled wheels, and prewash on non-coated cars	1:4 wheels 1:10 prewash 60 ml in foam cannon
Tire Shine	Dry rims only, at the end	—

■ Add-Ons

CHEMICAL	USE	DILUTION
Protector Wax	Foam cannon wax	2 caps in foam cannon
Guf	Floor mat restoration	See §12
Leather Star	Leather conditioner	—
Goo Gone	Tar and adhesive remover	—

10 Equipment & Maintenance

The van and the machines are the business. Treat them accordingly.

GENERATOR — THE THREE HARD RULES

- **Do NOT get it wet.**
- **Always run it on a level surface.** Use the plywood behind the passenger seat if you need to.
- **Never run the air compressor and pressure washer at the same time,** and never have three big machines running at once — air compressor, pressure washer, vacuum, steamer.

Vacuum

- Empty at Casey's when full.
- **Empty after every extraction job.**
- Keep the hoses clean.

Air Compressor

- Check for leaks regularly and **fix them immediately.**
- Clean the tornador.
- **Do not leave air in the tank** when it's not in use.

Water Tank

- Maintain **50–80 gallons minimum.**
- Use the customer's water if it's offered.
- Ask permission to use their water if you're running low.

Brushes & Scrub Pads

- Hand wash in the sink.
- Use **Dawn dish soap.**

Towels

- Use **Rags to Riches** detergent.
- Wash: **cold water only.**
- Dry: delicate / low heat.
- **Exterior towels wash separately,** extra delicate — may need multiple dry cycles.
- **Do not wash last minute** — they won't dry in time.

Daily — Before Every Detail

- Check van gas.
- Check generator gas.
- Check the gas can.
- Fill at Casey's using the **Matrix card.**
- Charge drill brush batteries daily.
- Fill all bottles before starting the day.

■ Generator Oil Change

- 01 **Set up:** generator on the table, oil rug underneath, towels on standby, drain pan ready.
- 02 Open the generator oil stick and tilt it onto the drain pan with the funnel while a second person holds the pan. **Be careful — tilting the generator can tilt the table too.**
- 03 Clean the area.
- 04 Use the funnel to pour in **5W-30 oil — 0.4 quarts.**

- 05 **Check the oil level.** It should be barely on the threads where you twist the oil stick on.
- 06 Check the air filter and make sure it's dry. A damp towel for a quick wipe, then towel dry it.
- 07 Run the generator for **5 minutes on a level surface.**

DO NOT OVERFILL

The oil **should barely be visible** on the threads. Overfilling damages the generator. Follow the step-by-step training exactly.

■ Inventory & End of Day

- ☐ **Notify Habib when running low** on tools or chemicals — give at least **one week of notice** before running out.
- ☐ Get the van fully ready for the next job. All required tasks, every night.

EMERGENCY MAINTENANCE CONTACT

We have a dedicated maintenance contact for urgent help, notice of upcoming maintenance, general questions and concerns, the backup generator, and backup reels. **Ask Habib for the number and save it in your phone before your first solo shift.**

11 Paint Correction & Ceramic Coating

Our highest-ticket services. Know this material before you ever touch a polisher to a customer's car.

■ What Paint Correction Actually Is

We offer a **one-step paint correction** that removes 60–80% of paint defects — swirls, light scratches, water spots. There is a two-step correction that we don't currently offer, which is a step up from that. There are multiple levels of pad and compound depending on the paint and how aggressive you need to go.

Paint correction is the **controlled mechanical abrasion of the clear coat** using abrasive compounds and polishing pads to microscopically level the paint surface. By removing a minimal amount of clear coat around a defect, light reflects more uniformly — permanently reducing or eliminating swirl marks, light scratches, oxidation, and water spot etching. The polisher and compound are attacking the clear coat and working the defects out.

■ What Ceramic Coating Actually Is

We offer a **3-year paint ceramic coating**, with add-ons for wheels and windows/windshield. It's a protective layer over the paint that shields it from environmental factors — rain, water spots, tree sap, bug acid — and keeps the

paint glossy and fresh longer. It also adds gloss, slickness, and a hydrophobic layer that makes water bead off.

That slickness makes the car easier to maintain and clean, but **it has to be maintained** so those environmental factors don't eat through it. Contaminants attack the *coating* instead of the paint — that's where the protection comes from, because bug gut acid or rain would be damaging the paint directly if left on. It's a hand-applied process that requires multiple buff-offs.

Gyeon MOHS EVO is a silicon dioxide (SiO₂)-based coating that chemically bonds to the clear coat, forming a durable hydrophobic layer. Once cured it increases surface hardness, improves chemical and UV resistance, reduces contaminant adhesion, and improves gloss.

WHY WE RECOMMEND CORRECTION FIRST

Paint correction is recommended **before** a coating, to bring the paint to good condition first. Otherwise the coating locks in and seals the paint *with* its defects. This is also why **Exterior + Ceramic Coating is for new cars only** — older cars need a correction first.

■ Our Products

Paint Correction

- **Dual action polisher**
- **Rupes foam pads**, softest to most aggressive:
 - WHITE ultra fine, softest
 - YELLOW** fine — middle, most used, most convenient
 - BLUE coarse — most aggressive
- **Koch-Chemie compounds**: Fine Cut is stronger and is what you use for a one-step correction. Micro Cut is more of a polish than a correction.
- **Meguiar's Ultimate Compound** — good for oxidation and restoring color, or as a polish. Not for correction or cutting.
- **Meguiar's iron remover** and a **clay towel** during the wash.
- **Gyeon Prep Spray** to remove excess compound and oils.

Ceramic Coating

- **Gyeon MOHS EVO** — paint and wheels. 3-year from a single coat, or 4-year from a double application.
- **Gyeon VIEW** — windows.
- Applied with an **applicator pad**. Use separate pads for rims and paint.
- **Gyeon Prep Spray** during and after correction, to remove excess polish compound and oils.

BLUE PAD

Most aggressive. Use cautiously, **spot test first**, never as a first resort — and generally only on a two-step.

PREP SPRAY TIMING

Prep spray preps the panel for coating, but **do not use it directly before coating** — the panel must be dry or it will affect the cure. We learned this the hard way.

■ Risks — Know These Cold

Paint Correction

- The polisher moves fast — **if any non-padded part hits the car it will scratch it.**
- Too high a speed setting, too much pressure, or staying in one spot too long **will burn the paint.**
- Buffer trails.
- Staining plastics and trim with compound.

Ceramic Coating

- **High spots** from excess coating not leveled properly.
- Uneven coating thickness.
- Premature coating failure from applying in a bad environment.
- Dust or debris trapped in the coating during curing.
- Smearing or streaking.

■ Step 1 — Paint Prep

- 01 Wheels and bug detail, same as §07.
- 02 Spray **iron remover on each panel while wet**, never on a dry panel. Let it sit 30 seconds while the other detailer follows behind and rinses it off. Adjust the sit time for heat and sun exposure — **do not let it dry on the paint.**
- 03 **Wash:** one detailer does the contact wash with a wash mitt while the other follows with the clay mitt.
- 04 **Clay mitt:** pressure rinse it before and after use. Go slowly, side to side. You'll feel the paint being rough — keep going side to side until it feels smooth. **Do not push hard.**
- 05 Continue and finish the exterior.

■ Step 2 — Paint Correction

- 01 Make sure the vehicle is **fully dry and in shade** — a garage is preferred.
- 02 Attach the correct pad for the job and **prime it** with 7–8 drops of compound, spread around the pad.
- 03 **Order:** roof first, then hood, then front bumper, then work your way around the vehicle. We do not paint correct wheels, glass, grille, or trim.
- 04 Use **4–5 drops of compound** per section and work in shoulder-width sections. Tap the pad onto the section a few times to transfer compound onto the paint for better spread. *Typical sectioning: roof ≈ 6 sections, hood ≈ 4–6, each door ≈ 3–4.*
- 05 **Start at speed 2** in a cross-hatch pattern, then bring it up to **4–5** and repeat without stopping.
- 06 Wipe the section with a soft towel, then follow with a second soft towel. Carry **three towels** with you through the buffing process.
- 07 Move to the next section and repeat.
- 08 Once the whole panel is done, spray **panel prep spray** on it and wipe with your third towel.
- 09 Move to the next panel and repeat.

NEVER TURN THE POLISHER ON OR OFF IN THE AIR

Put the pad on the paint *first*, then turn it on. Turn it off *while still on the paint* before lifting it away.

■ Step 3 — Paint Ceramic Coating

- 01 Vehicle must be **dry, prepped, paint corrected, and in shade** — garage preferred. You can do a final prep-spray pass over the whole vehicle, but don't coat a panel right after spraying it.
- 02 Read the instructions on the bottle before you start.
- 03 Work in the **same sectioning** as the correction. Carry 3–4 towels.
- 04 Prime the applicator pad with the coating.
- 05 **Per section:** dust off with towel 1 → apply coating → wait 10–20 seconds → buff with towel 2 → immediately buff again with towel 3 → and even towel 4.
- 06 Move to the next section and repeat.

WHY MULTIPLE BUFFING PASSES

Multiple passes are exactly how you prevent **high spots and uneven coating** after curing. Don't skip the third and fourth towel.

WINDOWS CERAMIC COATING

Gyeon VIEW, applied as a paid add-on. **Habib will walk you through this one in person during training** — don't attempt it on a customer car until then.

Package and add-on pricing for these services is in **\$04 Pricing Reference**.

12 Inventory & Stocking

The basement 5-gallon dispenser station — what goes in each one and how much.

THE ONE STOCKING RULE

Always keep **an extra bottle of the chemical on hand** so you can refill a dispenser the moment it runs out. Do not wait until a dispenser is empty and *then* order one.

■ 5-Gallon Dispenser Mixes

DISPENSER	POSITION	MIX
Tire Shine	Top left	1 gal Malco Aqua Beads tire shine + 1 gal water. <i>Only make this much — don't fill all the way up.</i>
Glass Cleaner	Top middle	2 cap fulls P&S rinseless wash + 4 gal water
Homemade Guf	Top right	6 × 16 oz bottles of 70% isopropyl alcohol + 6 × 6 oz bottles glycerin. <i>Makes 1 gallon — don't make more.</i>
Carpet Bomber	Under tire shine	See §09 for use dilution
Pol Star	Under Guf	2.75 gal water + 0.25 gal Pol Star. Bring the water to between the 2.5 and 3 markers first, then pour in the chemical — it should bring the total up to the 3 marker.
Dark Fury	Under Carpet Bomber	2 gal water + 0.5 gal Dark Fury 2.5 GAL TOTAL
Bug Remover	Under Pol Star	See §09 for use dilution
Acid	Between Dark Fury and Carpet Bomber	2 gal water + 0.5 gal Stinger 755 acid

ALWAYS KEEP A BACKUP

Keep a spare **5 L Pol Star** in inventory to refill that dispenser, and always keep a backup of **Terminator** — it goes through quick.
